Character Computing Oct 30 2020 The book gives an introduction into the theory and practice of the transdisciplinary field of Character Computing, introduced by Alia El Bolock. The latest scientific findings indicate that "One size DOES NOT fit all" in terms of how to design interactive systems and predict behavior to tailor the interaction experience. Emotions are one of the essential factors that influence people's daily experiences; they

influence decision making and how different emotions are interpreted by different individuals. For example, some people may perform better under stress and others may break. Building upon Rosalind Picard's vision, if we want computers to be genuinely intelligent and to interact naturally with us, we must give computers the ability to recognize, understand, even to have and express emotions and how different characters perceive and react to these emotions, hence having richer and truly tailored interaction experiences. Psychological processes or personality traits are embedded in the existing fields of Affective and Personality Computing. However, this book is the first that systematically addresses this including the whole human character; namely our stable personality traits, our variable affective, cognitive and motivational states as well as our morals, beliefs and socio-cultural embedding. The book gives an introduction into the theory and practice of the transdisciplinary field of Character Computing. The emerging field leverages Computer Science and Psychology to extend technology to include the whole character of humans and thus paves the way for researchers to truly place humans at the center of any technological development. Character Computing is presented from three main perspectives: ● Profiling and sensing the character ● Leveraging characters to build ubiquitous character-aware systems ● Investigating how to extend Artificial Intelligence to create artificial characters

The Road Mar 23 2020 NATIONAL BESTSELLER • WINNER OF THE PULITZER PRIZE • A searing, post-apocalyptic novel about a father and son's fight to survive, this "tale of survival and the miracle of goodness only adds to McCarthy's stature as a living master. It's gripping, frightening and, ultimately, beautiful" (San Francisco Chronicle). A father and his son

walk alone through burned America. Nothing moves in the ravaged landscape save the ash on the wind. It is cold enough to crack stones, and when the snow falls it is gray. The sky is dark. Their destination is the coast, although they don't know what, if anything, awaits them there. They have nothing; just a pistol to defend themselves against the lawless bands that stalk the road, the clothes they are wearing, a cart of scavenged food—and each other. The Road is the profoundly moving story of a journey. It boldly imagines a future in which no hope remains, but in which the father and his son, "each the other's world entire," are sustained by love. Awesome in the totality of its vision, it is an unflinching meditation on the worst and the best that we are capable of: ultimate destructiveness, desperate tenacity, and the tenderness that keeps two people alive in the face of total devastation. Look for Cormac McCarthy's new novel, *The Passenger*.

***Characters and Characterization in the Book of Kings* Aug 20 2022 This book is an examination of characters in the books of Kings; showing how understanding and interpretation of key characters affects readings of the story. The volume begins with more general pieces addressing how the study of characters can shed light on the composition history of Kings and on how characters and characterization can be considered with respect to ethics, particularly with respect to the moral complexity of biblical characters. Contributors then consider key characters within the Kings narrative in depth, such as Nathan, Bathsheba, Solomon and Jezebel. The contributors use their own specific expertise to analyze these characters and more, drawing on insights from literary theory**

and considering such approaches as questioning our view of a particular character with based on the character within the text with whom we identify. Contributors also assess whether or not characters as portrayed in the biblical text necessarily match up to their possible counterparts in history.

The Color Purple Apr 23 2020 Winner of the Pulitzer Prize and the National Book Award, this novel about a resilient and courageous woman has become a Broadway show and a cultural phenomenon. A PBS Great American Read Top 100 Pick Celie has grown up poor in rural Georgia, despised by the society around her and abused by her own family. She strives to protect her sister, Nettie, from a similar fate, and while Nettie escapes to a new life as a missionary in Africa, Celie is left behind without her best friend and confidante, married off to an older suitor, and sentenced to a life alone with a harsh and brutal husband. In an attempt to transcend a life that often seems too much to bear, Celie begins writing letters directly to God. The letters, spanning twenty years, record a journey of self-discovery and empowerment guided by the light of a few strong women. She meets Shug Avery, her husband's mistress and a jazz singer with a zest for life, and her stepson's wife, Sophia, who challenges her to fight for independence. And though the many letters from Celie's sister are hidden by her husband, Nettie's unwavering support will prove to be the most breathtaking of all. *The Color Purple* has sold more than five million copies, inspired

The Character of Jesus Jul 27 2020 This biography of Jesus Christ focuses upon the personal characteristics and traits which He demonstrated to the peoples of ancient Judaea. The author seeks to demystify and clarify the subject, with a rigorous reading of the New Testament lore and other accounts of Jesus. The character of the Son of God was established when He approached others with interest in their life situations, in the words He delivered to them, and the deeds He undertook in life. The author posits that Jesus wanted mankind to arrive at the truth of what God intends for humanity by observing his own personality; He set a thorough example of conduct for all men, of the virtues which believers

in the Lord can carry through life. Each quality Christ displays is given its own chapter. The author frequently quotes scripture to help his narration. We discover that Jesus was a candid person; delivering messages with frankness and clarity. He displayed patience, generosity, courage and enthusiasm in his daily life and sermons. Later on the work discusses the connections Jesus had with God; the holiness and reverence for the divinity He displays are significant. Finally the work summarizes the overall greatness of Christ. Charles Edward Jefferson was a clergyman who spent decades preaching in Ohio, writing several books on sermonizing and on various Christian topics.

Grit May 25 2020 In this instant New York Times bestseller, Angela Duckworth shows anyone striving to succeed that the secret to outstanding achievement is not talent, but a special blend of passion and persistence she calls "grit." "Inspiration for non-genius everywhere" (People). The daughter of a scientist who frequently noted her lack of "genius," Angela Duckworth is now a celebrated researcher and professor. It was her early eye-opening stints in teaching, business

consulting, and neuroscience that led to her hypothesis about what really drives success: not genius, but a unique combination of passion and long-term perseverance. In *Grit*, she takes us into the field to visit cadets struggling through their first days at West Point, teachers working in some of the toughest schools, and young finalists in the National Spelling Bee. She also mines fascinating insights from history and shows what can be gleaned from modern experiments in peak performance. Finally, she shares what she's learned from interviewing dozens of high achievers—from JP Morgan CEO Jamie Dimon to New Yorker cartoon editor Bob Mankoff to Seattle Seahawks Coach Pete Carroll. "Duckworth's ideas about the cultivation of tenacity have clearly changed some lives for the better" (The New York Times Book Review). Among Grit's most valuable insights: any effort you make ultimately counts twice toward your goal; grit can be learned, regardless of IQ or circumstances; when it comes to child-rearing, neither a warm embrace nor high standards will work by themselves; how to trigger lifelong interest; the magic of the Hard Thing Rule; and so much more. Winningly personal, insightful, and even life-changing, *Grit* is a book about what goes through your head when you fall down, and how that—not talent or luck—makes all the difference. This is "a fascinating tour of the psychological research on success" (The Wall Street Journal).

*Character Nov 23 2022 What is "character"? Since at least Aristotle's time, philosophers, theologians, moralists, artists, and scientists have pondered the enigma of human character. In its oldest usage, "character" derives from a word for engraving or stamping, yet over time, it has come to mean a moral idea, a type, a literary persona, and a physical or physiological manifestation observable in works of art and scientific experiments. It is an essential term in drama and the focus of self-help books. In *Character: The History of a Cultural Obsession*, Marjorie Garber points out that character seems more relevant than ever today, omnipresent in discussions of politics, ethics, gender, morality, and the psyche. References to character flaws, character issues, and character assassination and allegations of "bad" and "good" character are inescapable in the media and in contemporary political debates. What connection does "character" in this moral or ethical sense have with the concept of a character in a novel or a play? Do our notions about fictional characters catalyze our ideas about moral character? Can character be*

“formed” or taught in schools, in scouting, in the home? From Plutarch to John Stuart Mill, from Shakespeare to Darwin, from Theophrastus to Freud, from nineteenth-century phrenology to twenty-first-century brain scans, the search for the sources and components of human character still preoccupies us. Today, with the meaning and the value of this term in question, no issue is more important, and no topic more vital, surprising, and fascinating. With her distinctive verve, humor, and vast erudition, Marjorie Garber explores the stakes of these conflations, confusions, and heritages, from ancient Greece to the present day.

The Character Concept in Evolutionary Biology Oct 22 2022
Almost all evolutionary biologists, indeed all biologists, use particular features to study life. These characteristics or features used by evolutionary biologists are used in a particular way to unravel a tangled evolutionary history, document the rate of evolutionary change, or as evidence of biodiversity. "Characters" are the "data" of evolutionary biology and they can be employed differently in research providing both opportunities and limitations. The Character Concept in Evolutionary Biology is about characters, their use, how different sorts of characters are limited, and what are appropriate methods for character analysis. Leading evolutionary biologists from around the world are contributors to this authoritative review of the "character concept." Because characters and the conception of characters are central to all studies of evolution, and because evolution is the central organizing principle of biology, this book will appeal to a wide cross-section of biologists. Focuses upon "characters" -- fundamental data for evolutionary

biology Covers the myriad ways in which characters are defined, described, and distinguished Includes historical, morphological, molecular, behavioral, and philosophical perspectives

Character Theory of Finite Groups Feb 14 2022 Character theory is a powerful tool for understanding finite groups. In particular, the theory has been a key ingredient in the classification of finite simple groups. Characters are also of interest in their own right, and their properties are closely related to properties of the structure of the underlying group. The book begins by developing the module theory of complex group algebras. After the module-theoretic foundations are laid in the first chapter, the focus is primarily on characters. This enhances the accessibility of the material for students, which was a major consideration in the writing. Also with students in mind, a large number of problems are included,

many of them quite challenging. In addition to the development of the basic theory (using a cleaner notation than previously), a number of more specialized topics are covered with accessible presentations. These include projective representations, the basics of the Schur index, irreducible character degrees and group structure, complex linear groups, exceptional characters, and a fairly extensive introduction to blocks and Brauer characters. This is a corrected reprint of the original 1976 version, later reprinted by Dover. Since 1976 it has become the standard reference for character theory, appearing in the bibliography of almost every research paper in the subject. It is largely self-contained, requiring of the reader only the most basic facts of linear algebra, group theory, Galois theory and ring and module theory.
